We would like to inform you about the properties and characteristics of natural materials - veneer, stone and natural leather - such as: changeability of the color of a single element, irregular veins/graining, microcracks, holes and about the fact that they are not their disadvantages but advantages. This makes the elements made of natural components, have unique and decorative character. Veneer is not resistant to heat and changes its color when exposed to the sunlight. For more information, check „Taking care of your MARO furniture“ manual.

This publication does not constitute an offer in legal terms. MARO reserves the right to introduce changes to the offered furniture. Presented colors may differ from reality. All designs are protected by the Polish Patent Office
